PROFESSIONAL SUMMARY

Content and AI strategist who builds systems for the era of generative search. I combine a lawyer's precision in structure and evidence with hands-on experience building retrieval-augmented generation (RAG) and document intelligence pipelines. I understand how LLMs parse, retrieve, and cite information because I've built the infrastructure that does it. I am seeking to apply this combination to lead Perfect Hideaways' AI search and content strategy, ensuring the brand becomes the definitive answer for travellers using AI agents.

SELECTED WORK - <https://github.com/osmanaaqib/perfect-hideways-geo-audit>

Perfect Hideaways — GEO Audit & AI Citation Strategy (2026)

A controlled audit of six traveller queries across three AI platforms, with a ninety-day strategy for improving AI search visibility. Includes schema recommendations, content restructuring guidelines, and a measurement framework.

Sample GEO-Optimised Hideaway Page (2026)

A sample hideaway page written in the format I would set as the editorial standard: a fact layer for AI systems, the story for humans, and a structured FAQ at the end. Attached to this application.

CORE COMPETENCIES

Generative Engine Optimisation (GEO/AEO) · AI Content Strategy · Editorial Leadership · Large Language Models (LLMs) · Retrieval-Augmented Generation (RAG) · Schema Markup & Structured Data · Entity Optimisation · Brand Voice & Tone · AI Search Auditing · Content Team Management · Knowledge Engineering · Legal Research & Reasoning

PROFESSIONAL EXPERIENCE

AI & Document Intelligence Extern, Pfizer — Document Processing Program

February 2026 – Present

- Building and evaluating RAG systems and OCR pipelines in a regulated, document-heavy environment.
- Designing structured data extraction workflows that produce validated JSON outputs from unstructured source documents.
- Benchmarking AI output accuracy and retrieval quality, developing systematic evaluation methodology for AI system reliability.

Content Workflow Volunteer, Bayyinah Institute

July 2025 – January 2026

- Reviewed and refined educational subtitle content to strict style-guide standards, ensuring accuracy and consistency across a distributed editorial team.
- Designed repeatable AI-assisted content workflows with human-in-the-loop quality assurance, maintaining editorial integrity while improving throughput.
- Contributed to a team producing educational content for a global audience, working within defined brand and quality standards.

Candidate Attorney — Litigation & Legal Operations, Office of the State Attorney, Department of Justice

January 2025 – January 2026

- Managed a high-volume portfolio of government litigation, developing advanced skills in legal research, evidence analysis, and structured argumentation.
- Served as Deputy Group Leader, coordinating matter allocation across external firms and leading workflow processes to a consistent standard.

- Drafted pleadings, legal opinions, and formal correspondence to a standard requiring absolute precision in language and logical structure.
- Built and maintained a structured case-tracking system to improve information accessibility across a large caseload.

AI Automation Extern, Wayfair

December 2025 – January 2026

- Built autonomous AI agents using n8n to automate market intelligence and content generation workflows.
- Designed and deployed a live dashboard integrating trend data, competitor analysis, and content recommendations.

Legal Intern, UKZN Law Clinic

January 2024 – December 2024

- Conducted client consultations, drafted legal opinions, and managed case files under supervision.

KEY PROJECTS

Private Legal AI & Document Intelligence Portfolio, Independent Project

- Designed and built a privacy-first legal AI pipeline using local LLM inference and Python-based document intelligence.
- Developed spatially grounded extraction, semantic section classification, table reconstruction, and OCR quality metadata.
- Architecture designed to feed structured evidence into a local RAG layer for source-grounded, citation-backed output.

TECHNICAL & AI SKILLS

AI & LLM Systems: RAG (LlamaIndex, FAISS, Chroma) · Prompt Engineering · AI Agent Development (n8n) · LLM Evaluation · Local Model Inference · Generative AI

Document Intelligence: OCR (Tesseract, PaddleOCR, EasyOCR) · Structured Data Extraction (JSON) · Document Classification · Layout Analysis

Programming & Platforms: Python · SQL · Microsoft Power Platform (Power Apps, Power Automate, Power BI, Dataverse) · Azure AI · Streamlit · Gradio

Editorial & Strategy: Content Architecture · Schema Markup · Entity Optimisation · Editorial Leadership · Brand Voice Development · Research & Analysis

EDUCATION

Bachelor of Laws (LLB), University of KwaZulu-Natal (UKZN)

- Multiple Distinctions · Dean's Commendations · Certificate of Merit

Practical Legal Training (PLT) — 400 Hours, Illovo Paralegal & Commercial College (IPCE)

- Appointed Deputy Firm Director in Moot Court, leading team operations and quality control.

CERTIFICATIONS

- **Generative Engine Optimisation (GEO) & Answer Engine Optimisation (AEO):** Intensive study of GEO/AEO principles, entity optimisation, schema markup implementation, and AI citation strategies (self-directed, 2026)
- **Anthropic** — Claude 101 | AI Fluency | Claude Code in Action
- **Microsoft** — 365 Copilot: Legal Use Case | Purview eDiscovery
- **Microsoft Learn** — 54 Modules | 12 Learning Paths | 41+ Hours (AI, Power Platform, Azure AI, Power BI)
- **Harvey AI** — AI for Legal Basics
- Lean Six Sigma White Belt

LANGUAGES

English (Fluent) · Arabic (Basic) · Afrikaans (Basic)
